

INFORMATION ASSURANCE

THE TEN COMMANDMENTS OF CYBER SECURITY

(Hardware and software does not apply to DoD computers)

- 1. Protect all personal information**
- 2. Stay current on security patches for all software on your computer**
- 3. Install and update (at least weekly) Anti-virus software**
- 4. Make use of software and/or hardware firewalls**
- 5. Do not open suspicious email**
- 6. Only install software from trusted sources**
- 7. Never share with anyone your user ID or password**
- 8. Learn techniques to create strong and "hard to guess" passwords**
- 9. Be aware of normal operational behavior of your computer**
- 10. Never provide personal information in response to any email**
